

# Homebound

Build Steps | Scott Mackenzie 1277194

1/10/2015

1. Open the source folder.
2. Open the domake.bat file using a .txt editor
3. On the first line where "path= \*\*\*\*\*INSERT devkitadv-r5-beta-3 FOLDER PATH HERE\*\*\*\*\*" is. Include the path to the devkitadv-r5-beta-3 folder which is included in the source folder.  
E.g. Path= C:\Users\User \Game 2 - Scott Mackenzie\Source\devkitadv-r5-beta-3\bin
4. Run the domake.bat file.
5. Drag the generated homebound.gba file on to the VisualBoyAdvanace-M-WX application.
